RUDRAKSH SACHDEVA

PROFILE

Computer Science undergraduate skilled in full-stack development and machine learning. Proficient in Python, Java, JavaScript, React, HTML, CSS, Django, Flask and REST APIs. Experienced in building scalable web apps and deploying ML models using Pandas, NumPy, and Matplotlib. Known for writing clean code, solving real-world problems, and collaborating in agile teams. Actively seeking roles in software development, machine learning, or web technologies. Github: github.com/Rudrakshsachdev

HIGHLIGHTS

- **Hackathon Winner** - 1st Place at Hack-Tech 2025
- **Smart Resume Parser** - Extracted resumes data using Python & Django
- **Traveler Professor – Full Stack Application** - Built a Django + React travel management platform with role based access & trip automation.

KEY SKILLS

- C, Python & Java
- HTML, CSS & JavaScript
- Django & Flask
- REST APIs, Git & Git-hub
- AI & ML
- Data structures & Algorithms (DSA)
- Object Oriented Programming (OOP)
- SQL, React, Typescript

WORK EXPERIENCE

Python Developer Intern
ELEVATE LABS | Bengaluru, Karnataka, India (Remote)
June 2025 – July 2025

Contributed to backend development and automation tasks using Python for internal tooling and process optimization.
Designed and implemented web-based applications with Flask, integrating RESTful APIs for seamless data exchange.
Collaborated remotely using Git and GitHub for version control, adhering to agile development methodologies. Applied software engineering best practices including modular design, code readability, and continuous integration principles.

Freelance Software Developer
Freelance | Delhi, India (Remote)
September 2025 – Present
Built and delivered scalable, user-friendly web and software solutions for startups and small businesses, focusing on clean architecture, automation, and responsive design.

EDUCATION

Bachelor of Technology – Computer Science & Engineering
IILM University, Gurugram
Aug 2024 – June 2028 (Expected)
